ReasonOS | Public ECG reference

Lead II | Original ten-second recording | 25 mm/s | 5 mm/mV | One small grid square = 1 mm

Calibration exercise: 25 mm of horizontal grid equals 1 second at the printed speed.

A 20 mm horizontal interval equals 800 ms. These are time-scale checks, not rhythm labels.

Rendered from recorded digital samples. Not an original hospital printout. No diagnostic interpretation.
